

CCE Surfacing

The Resin Surfacing Specialists

A resin surface can add a sophisticated, neat finish to any driveway, garden or patio area. We have a huge range of natural stone colours to complement any property.

Providing Quality Surfaces Nationwide for Over 20 Years

Resin Bound

Your chosen natural aggregate is mixed with a high quality adhesive resin, specially formulated to be both hard-wearing, weather and light resistant. This is then laid on the prepared surface. The result is a fully permeable paving solution which allows water to freely drain, complying with SuDS standards (Sustainable Urban Drainage Systems).

Resin Bonded

A high quality adhesive resin, specially formulated to be both weather and light resistant, is applied to the prepared area. The chosen aggregate is liberally scattered over the adhesive surface, allowed to dry and the excess brushed off. This surface is textured and non-porous.

Call us today on 01285 65 20 20 or drop us a line at enquiries@cce-surfacing.co.uk. We are happy to visit your project, talk about your options, discuss costs and give advice; all without any obligation.

The price we quote is the price you pay. There are never any hidden extras.

Our "Resinset™" Resin Bound and Resin Bonded Surfaces are a perfect and attractive alternative to standard paving surfaces such as tarmac, block paving or concrete.

CCE Surfacing have been supplying quality surfaces, Nationwide for over 20 years'. Our extensive product knowledge and expertise, ensures every landscape project is a success. All our operatives are directly employed by us.

We are also expert soft landscapers and can perform a whole garden design service.

CCE Surfacing started trading in 1997 and have provided miles of quality decorative surfaces to properties of all sizes Nationwide (including Buckingham Palace).

We offer a 'whole package' service from conception to completion.
