CCE Surfacing are skilled and experienced in large and small scale hard landscaping projects for commercial, residential and self-build clients. Our extensive product knowledge and expertise, ensures every landscape project is a success.

Tree Pits

Trowelled smooth surface
SUDs compliant permeable paving system

Our tree pit method allows for water to filtrate down to the roots. The tree can expand as it grows.

A tree pit can also be laid around an existing mature tree.

The layer of resin bound aggregate protects the tree from pedestrian footfall

For growing trees allow 50mm clearance around the trunk

CCE Resinset™ Resin Bound porous paving system: 40-50mm depth, using 6-10mm stone

MOT Type 3 compactable stone to allow percolation of water

Sandy loam soil well compacted around the roots to avoid settlement
